

Ready Engineered Project Management System

THE PROJECT MANAGER DAILY TOOLBOX

REN-PMS

OBJECTIVES

RENPMs system is designed as a practical toolbox in **day by day project management activity** and allows a Project Manager with minimal knowledge to keep under control a project: *objectives, budget and cash flow, deadlines and quality standards.*

KEY FEATURES

By using the **RENPMs** system allows a project manager to answer to critical questions of stakeholders regarding:

- **Schedule, Deadlines & Time Framing** – project completion in agreed & assumed timeframe
- **Budget & Costs Framing** – project completion in projected financial terms
- **Potential Risks** – what are the risk we are exposing to and how can be avoided
- **Cash Flow** – manage payments when and how much, debt deadlines & funding requirements
- **Quality Conformity** – bounding to technical, environmental & legal requirements
- Various other **administrative issues** like missing documents, closed documents, meetings
- **Security & audit** features – trace of who and when modified records (not in SL Edition); full log of all system operations
- The process of periodically **project review** and 'find out the real situation'

Please refer to product user documentation or sales presentation for more details.

MODULES & COMPONENTS

PD Project Definition

This module is designed to open and right /complete define a project.

- **Project Charter** – the project frame & boundary

- **FBS** (Functional Breakdown Structure) – how project logical architecture covers objectives
- **PBS** (Product Breakdown Structure) – how project physical architecture covers logical functionalities

PP Project Planning

- **WBS** (Work Breakdown Structure) – what activities are needed to put in practice project functionalities with physical architecture
- **Technical Planning** – technical plan & schedule or „who does what when“
- **Financial Planning** – financial planning in terms of budget and cash flow

PE Project Execution

- **% of Completion & Current Tracking** – estimation and updating actual completion of deliverables
- **Operational Sessions** – all kind of operational meetings
- **Risk Sessions** – risk evaluation meetings

PM Project Monitoring

- **Technical Analysis**
- **Financial Analysis**
- **Risk Analysis**
- **Project Review**

PF Project Financials

- **Accounting** (financial accounting)
- **Cost Control** (management accounting)
- **Advanced Financial Analyzer**

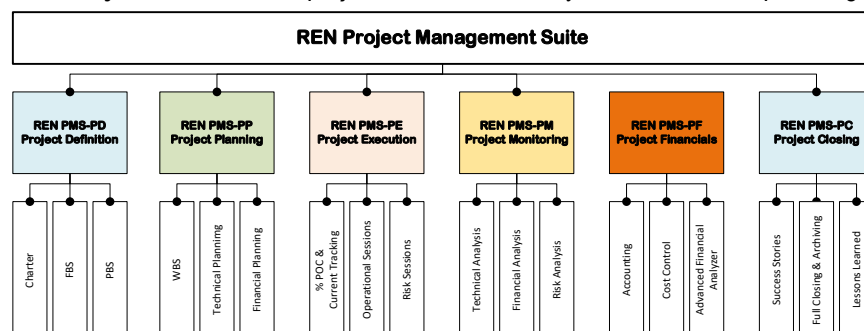

PC Project Closing

- **Success Stories** – all marketing materials you need at the end
- **Full Closing & Archiving**
- **Lessons Learned** – all you need to learn and capitalize gained experience

Reporting

The system has its own reports with normal project management deliverables. Also, the system has some special reports, more exactly:

- **Check lists** that help you in clarifying and defining all project issues. More than that, these check lists will assure you that is anything important missed or forgotten

- Project charting and all you need 'red – amber – green' reports like to maximize visual experience
- Notifications and 'TODO' lists that shows you what the project need to ask or clarify in order to have a clearly and well defined foundation

There are other products available in conjunction with this product, for example **PG-BOA** for project portfolio charting and monitoring mainly designed for project offices and middle to top managers. Also **POREV** is an independent product or **RENPMs** add on special designed for projects review and internal audit which allows you to find out the real project status or at least to see the level of interest regarding the project. The last time the project was 'visited' can tell more that any other situation or report about that project. Please refer to company portfolio to find out more products.

TRAINING PROGRAMS

For this product, all portfolio of training programs, from *basic system concepts* to *project management daily tips & tricks* is available for this product. Also, a book is available as companion of the product or just as "project manager cook book".

Also, there are training programs for anyone who want to *certify and sell services* regarding **RENPMs** system. Please call us and you'll be counseled to find out the most appropriate solution for you taking into account your personnel, knowledge, time and budget.

EDITIONS & PRICING

RENPMs Standalone Local Edition (SLE)

version installed locally / on your computer and with a small footprint database and JSON files

RENPMs Network Office Edition (NOE)

still locally / on your computer installed and all functionalities from previous edition, but also can work with a bigger common / shared database. Because this is a version (first) where all projects are stored & available, also the **PG-BOA** & **POREV** products are available as options / add on to **RENPMs**.

RENPMs Enterprise Edition (EE)

a full enterprise deployment with separate components for database and web application. Accessible remotely from any standard internet browser and synchronizing with your local copy of **RENPMs**

RENPMs OVAS Edition

available for certified partners who *deliver Project Managements services to be used as value added service outsourced* on your own cloud or cloud like platforms.

RENPMs DEV Edition

available for certified partners to be *embedded in their own systems* as core of project-based manufacturing solutions

Supported operating systems

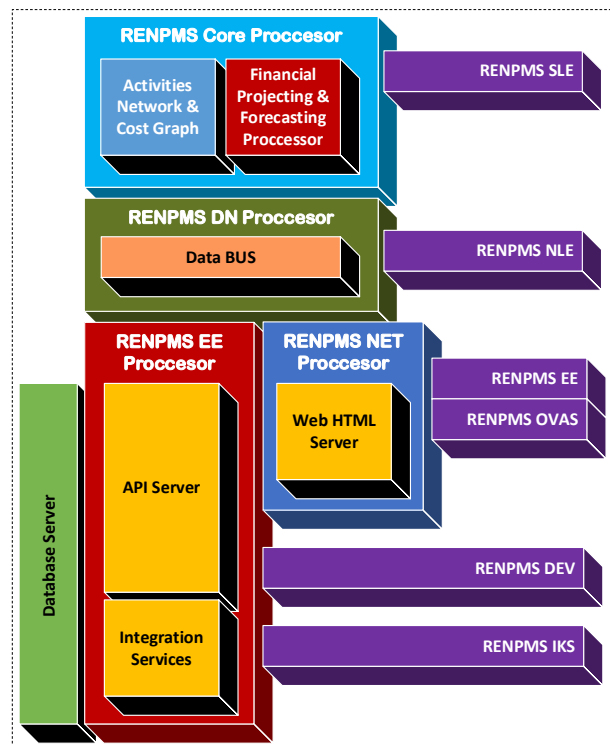

Local **RENPMs** system is available for *Windows* (greater than 8) and for *Linux* (any standard distribution). With some reasonable effort can be used also on *MacOS*.

Licensing

The product is MIT licensed without the right of resell or distribution.

INTEGRATION

Gracefully to its architecture, the **RENPMs** EE, OVAS and DEV editions support for integration add-ons and cartridges with 3rd party / external systems such as:

- Document Management
- Project-based Manufacturing
- Accounting & Cost Control

The Integration Kits (**RENPMs IKS**) are available for some 3rd party commercial products as well as special developments and customization services for other 3rd party products you own.

ADDITIONAL SERVICES

- Installation for Enterprise Edition over Ubuntu Server (including Ubuntu Server itself)
- Training & certifying
